[†]40% more calories per carton vs Kate Farms® Standard 1.0.

The cost of feeding intolerance and malnutrition

Nutrition interventions improve outcomes

In one study (N=1546), at-risk and malnourished home care patients were given supplemental oral nutrition formula for 30 days.⁵

Results:

20%

lower hospital readmission rates

\$2.3 million

total healthcare savings in the 90-day period

In an analysis (N=44 million) spanning 11 years, hospitalized patients were given supplemental oral nutrition formula.⁶

Results:

21%

decrease in length of hospital stay

21.6%

decrease in hospital costs

6.7%

decrease in likelihood of 30-day readmission

What difference could **high-quality nutrition** and **improved tolerance** make in your patients? Make Kate Farms your **first choice**.

Tolerance

Your formula was a life saver, had tried two previous companies and couldn't tolerate either of them, now I'm thriving and gaining weight, thank you for such a great product.

— Debra G.

Made for Tolerance

Look inside!

The higher standard for weight gain and maintenance

- ✓ Easily digested organic pea protein*
- ✓ Low osmolality that may support GI tolerance
- ✓ Organic MCT oil for easy fat absorption
- ⊘ No common allergens, such as milk, eggs, fish, shellfish, tree nuts, peanuts, wheat, soybeans, or sesame
- ⊘ No non-nutritive or artificial sweeteners and no artificial flavors, colors, or preservatives
- ⊘ No corn

High-quality, science-backed ingredients

- ✓ Unique fiber blend that supports tolerance, gut health, and the microbiome⁷
- ✓ Organic phytonutrient blend
- ✓ Low glycemic index⁸

Clinically demonstrated

Improving tolerance and weight gain

In a large study (N=392), patients who switched to Kate Farms reported^{9†}

89%

improved nutrition[‡]

86%

weight gain or maintenance[§]

79%

feeling healthier^{||}

67%

improved digestive symptoms[¶]

Weight gain

*I have been dealing with digestive issues and have lost too much weight. Thanks to Kate Farms, I have found a **delicious supplement that is helping me gain weight**. It's a high-calorie product, which uses high-quality, plant-based ingredients.*

— Elizabeth B.

*Kate Farms formulas contain all 9 essential amino acids from pea protein with added L-Cysteine and L-Tryptophan to provide a Protein Digestibility Corrected Amino Acid Score (PDCAAS) of 1.0.

†Formulas included in the study were Kate Farms Pediatric Standard 1.2, Standard 1.0, Pediatric Peptide 1.5, and Peptide 1.5.

‡Respondents reported that they agreed/strongly agreed that Kate Farms formulas improved their nutrition.

§Of total respondents (n=392), 58.4% reported weight gain and 27.8% reported no change in weight.

||Respondents reported that they agreed/strongly agreed that they felt healthier while on Kate Farms.

¶Respondents reported that they agreed/strongly agreed that they had improved digestive symptoms while on Kate Farms.
